

1st OPEN HOUSE

Highway 1 Alignment and Area Network Highway 842 to Highway 797 Functional Planning Study

The Alberta government has retained McElhanney Consulting Services to undertake a functional planning study to determine long-term requirements for the provincial highway network in the corridor east of Calgary. The corridor under study extends from:

- Highway 797 in the west to Highway 842 in the east, and
- Highway 1 in the north to Highway 22X/901 in the south.

The study is long-term, intended to identify a Highway 1 bypass of Strathmore and other future highway network requirements in the study area, including Highways 21, 24 and 817.

The Alberta government has scheduled three open houses for this study. The first open house is for information gathering and will provide an opportunity for public input on the study process, problem and issue identification and the development of a highway network plan. Interested community residents, business operators, property owners and other stakeholders are invited to attend and view the exhibits.

Monday, November 23, 2009

4 to 8 p.m.

Wheatland County Office

RR 1, Strathmore, Alberta

(North side of Hwy 1 at Rge Rd 243, 1.6 km west of Hwy 21)

For more information on the open houses or planning study please contact Henry Devos, McElhanney Consulting Services Ltd. at (888) 451-2311 (toll-free) or email at hdevos@mcelhanney.com
